Harjeet J L

Cloud Engineer | DevOps & CloudOps | AWS, Terraform, Jenkins, Docker, Kubernetes (EKS), ECS

Chennai, India | harjeet241102@gmail.com | +91 94442 70177 | linkedin.com/in/harjeet-jl | github.com/Harjeet2411

SUMMARY

Cloud Engineer with 2+ years of experience at KFin Technologies, specializing in DevOps and CloudOps on AWS within a regulated financial-services environment. Designs CI/CD release pipelines, infrastructure as code and container platforms that replace manual processes with reliable, self-service automation, and supports production systems as part of a 24/7 operations team. Develops internal engineering tooling in Python and Java, including an AI-assisted build-failure analysis plugin for Jenkins. Holds a B.Tech in Computer Science (AI/ML) and brings early-stage startup experience, strong cross-functional collaboration and a commitment to mentoring in DevOps best practices.

SKILLS

Cloud (AWS): ECS, EKS, EC2, ALB, CloudFront, S3, Lambda, Step Functions, CloudWatch, IAM cross-account roles
IaC & CI/CD: Terraform, CloudFormation (StackSets), Jenkins, GitHub Actions, Gitea, Git
Containers & OS: Docker, Kubernetes (EKS), Amazon ECS, Linux
Observability & Ops: Grafana, CloudWatch, Application health monitoring, 24/7 production support
Languages & Frameworks: Python, Java, Shell Scripting, SQL, FastAPI, Django, REST APIs, PostgreSQL, MySQL

EXPERIENCE

Cloud Engineer, KFin Technologies Ltd. *Hyderabad May 2024 - Present*

- Cut application build and deploy time from about 6 hours of manual work to 5-7 minutes, and revision deployments from about an hour to minutes, by automating releases with Jenkins and Terraform.
- Delivered 2,000+ production deployments across 44 AWS accounts in multiple regions, including one account with 42,000+ resources.
- Built per-application Jenkins pipelines integrated with Gitea that run tests on every push, build and push Docker images, update ECS task definitions and services, and monitor deployments until healthy.
- Migrated on-prem and EC2-hosted applications to containerized services on Amazon ECS and EKS (Kubernetes).
- Replaced manual infrastructure provisioning with dynamic Terraform modules parameterized from Jenkins, so teams create resources without editing YAML or .tf files.
- Member of the 24/7 production support team, troubleshooting and resolving production-level failures across AWS-hosted applications on Linux EC2.
- Joined as an intern in May 2024 and converted to full-time Cloud Engineer; recognized at organization level for building reliable, scalable CI/CD pipelines.

IT Analyst (Head Intern), Early Team, Nytehikan Apparel *Sep 2023 - Feb 2024*

- Early team member who helped build the startup from scratch, leading its IT function and building the e-commerce platform with SEO and WooCommerce.

Data Science and Software Development Intern, Sterling Software Private Limited *Dec 2022 - Feb 2023*

- Built Python tooling for log parsing, developed APIs, and managed Django databases.

PROJECTS

BuildForge: AI Failure Analysis Plugin for Jenkins | Java, Python, MCP | KFin (internal)

- Java Jenkins plugin with a Python service and an AI agent (MCP) that troubleshoots every failed build, showing the root cause and proposed fix under the failing stage with no Jenkinsfile changes.
- Tracks failures per day, recurring errors, rebuild success and median time to fix on an admin dashboard; logs each failure as an incident with Teams alerts.

Centralized AWS WAF Monitoring Platform | KFin (internal team tool)

- Monitors WAF activity across 44 AWS accounts with Python Lambdas, Step Functions, RDS PostgreSQL and a FastAPI service on ECS Fargate; every change runs through simulate, approve, execute, verify and audit.

EDUCATION

B.Tech, CSE (AI and ML), Sri Ramachandra Faculty of Engineering and Technology (SRIHER), Chennai *2020 - 2024*

CGPA 8.3/10 | AWS Academy: Cloud Foundations, Machine Learning Foundations
